LUMENX

LIGHTING, ENGINEERED FOR REAL PROJECTS

LumenX delivers intelligent lighting solutions that connect design, technology, and performance.

LumenX is a technically driven lighting business serving retail, commercial, and industrial projects. We integrate into project teams and take technical ownership of lighting from design through to site delivery. Our work combines engineering depth, design intent, and buildable project execution with consistency, compliance and precision.

Company Overview & Background

Core Specialisation	Technically led lighting solutions and building management systems (BMS)
Geographic Reach	Available nationwide to support projects across South Africa
Market Focus	Retail, commercial, and industrial environments

LumenX was founded to bring stronger technical ownership into lighting delivery. Rather than acting only as a product source, we work as a project partner - aligning design intent, engineering requirements, commercial realities, compliance and on-site execution into one accountable lighting solution.

Mission

To solve the delivery gap in lighting by bringing technical depth, accountability, and executional precision to every project.

Vision

To become the trusted technical lighting partner for projects known for buildable design, reliable delivery, and performance-led outcomes.

Core Values

Technical integrity. Project accountability. Practical innovation. Consistency in delivery. Responsiveness under pressure.

Team

LumenX is built around technically minded project support, combining lighting design, lighting knowledge, specification thinking, simulation, 3D modelling, compliance, and delivery coordination. We work closely with developers, consultants, architects, engineers, contractors, and procurement teams to help keep projects moving from concept through to handover.

Services & Capabilities

Lighting Design

Technical guidance that helps translate concept and design intent into coordinated, project-ready lighting solutions.

Product Specification & Selection

Selection of fit-for-purpose luminaires and control options aligned to application, performance, budget, and compliance requirements. From products with 8 year guarentees to bespoke lighting for any application.

Value Engineering

Practical optimisation of lighting solutions to protect performance, compliance, and design intent while improving cost efficiency.

Project Supply & Site Delivery

Managed supply, logistics, and delivery coordination to ensure the right products arrive in the right sequence for installation timeously.

Project Coordination

Close collaboration with consultants, contractors, developers, and procurement teams to keep the lighting package aligned throughout execution.

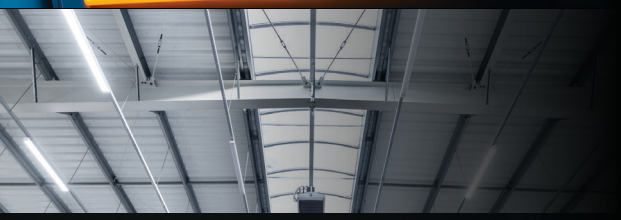

Smart Lighting & Controls

Support for intelligent lighting systems, control integration, and energy-efficient solutions that improve usability and long-term performance.

After-Sales Technical Support

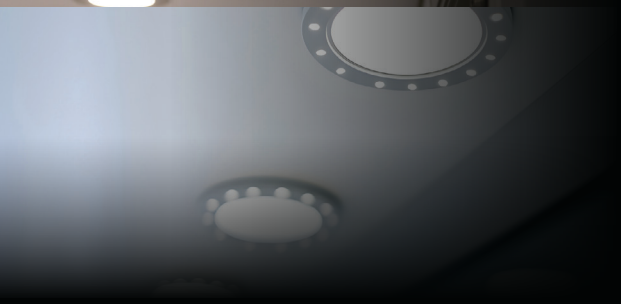

Ongoing support for commissioning queries, replacements, snag resolution, and product performance issues where required. Service guarantess for full duration.

Product Portfolio

Architectural & Commercial Lighting

Interior and exterior solutions developed for visual comfort, aesthetics, and performance in built environments.

Industrial & Warehouse Lighting

High-output, durable lighting solutions designed for demanding operational spaces and efficient maintenance cycles. Industry leading guarentees.

Street & Outdoor Lighting

High-output, durable lighting solutions designed for demanding operational spaces and efficient maintenance cycles.

Emergency & Compliance Lighting

Emergency fittings and compliant solutions that support safety requirements, wayfinding, and statutory obligations.

Smart & Energy-Efficient Systems

LED, controls, sensors, and energy-conscious solutions focused on efficiency, adaptability, and long-term value.

Industries Served

- Commercial developments
- Retail centres
- Hospitality
- Healthcare
- Education
- Industrial facilities
- Government and infrastructure
- Explosive Environments

Our portfolio is shaped around practical project demands, allowing us to support a wide range of environments without compromising on technical fit, quality, or compliance.

Partnerships & Compliance

Brands & Manufacturing Partners

LumenX works with trusted manufacturing and supply partners selected for performance, consistency, and project suitability.

Compliance & Quality Assurance

Standards alignment	Products selected and supplied with consideration for applicable SABS, IEC, OSHACT and relevant project compliance requirements.
Energy performance	Focus on efficient LED and control-based solutions that support project energy targets and lifecycle value.
Warranty support	Industry leading manufacturer-backed warranty terms communicated clearly per product range and project scope.
Quality assurance	Technical review, documentation checks, and coordinated supply processes to reduce specification and delivery risk.
B-BBEE status	B-BBEE level 2.

Why Choose LumenX

Technical expertise

A technically driven approach grounded in specification knowledge, engineering understanding, and practical project delivery. Practical lighting designs and simulations.

Reliable stock and supply chain support

Supply coordination designed to support programme certainty, site requirements, and reduced delivery friction.

Competitive project pricing

Commercially aware solutions that balance quality, compliance, and cost with real project constraints in mind.

Fast quotation turnaround

Responsive quoting and technical feedback to help consultants, contractors, and developers move faster.

Professional project coordination

Active involvement across the project lifecycle, from design alignment and submissions to on time delivery and after-sales support for the full guarentee duration and beyond.
